

IN THE SPECIFICATION

Please insert the following paragraph of page 4 before the existing paragraph on line 19.

--Fig. 2a is a sectional view of a rotor of a gas turbine of coolant recovery type of an embodiment of the present invention;--

Please amend the first paragraph on page 23, line 3.

In the present embodiment, the steam supply port to the rotor is the inner flow path 20 of the separation pipe 19 and the recovery port is the outer flow path 59 of the separation pipe 19, ~~however~~. However, it is possible to reverse the supply port and the recovery port, that is, it is possible to flow the steam in reverse as shown in Fig. 2a.
